**AUTHORITY:** §§ 729.604 to 729.617, inclusive, issued under 52 Stat. 33, 55 Stat. 48, 59 Stat. 9; 7 U. S. C. and Sup., 1301, 1353, 1359, 1361-1363, 1373, 1375.

§ 729.604 *Basis and purpose.* The regulations contained in §§ 729.604 to 729.617, inclusive, are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, and govern the establishment of 1948 farm acreage allotments for peanuts. The purpose of the regulations in §§ 729.604 to 729.617, inclusive, is to provide the procedure for allocating among farms the national acreage allotment for peanuts produced in the calendar year 1948 (12 F. R. 4330) as apportioned to States (12 F. R. 6376) Prior to preparing the regulations in §§ 729.604 to 729.617, inclusive, public notice (12 F. R. 5598) was given in accordance with the Administrative Procedure Act (60 Stat. 237). No views or recommendations of growers of peanuts or other interested persons have been received in response to the notice.

Compliance with the 30-day effective date requirement of the Administrative Procedure Act is impracticable in that a referendum to determine whether peanut farmers favor or oppose marketing quotas with respect to the 1948, 1949 and 1950 crops must be held not later than December 15, 1947, and it is in the public interest as well as the interest of peanut farmers that the regulations herein become effective immediately in order that the data necessary to the determination of farm acreage allotments and marketing quotas may be assembled and the allotments for individual farms established and made available to farmers before the date of such referendum. Therefore, it is hereby ordered that the regulations contained in §§ 729.604 to 729.617, inclusive, shall become effective upon publication in the **FEDERAL REGISTER**.

§ 729.605 *Definitions.* As used in §§ 729.604 to 729.617, inclusive, and in all instructions, forms and documents in connection therewith the words and phrases defined in this section shall have the meanings herein assigned to them unless the context or subject matter otherwise requires.

(a) *Committees.* (1) "Community committee" means the group of persons elected within a community to assist in the administration of the Agricultural Conservation Program in such community.

(2) "County committee" means the group of persons elected within a county to assist in the administration of the Agricultural Conservation Program in such county.

(3) "State committee" means the group of persons designated as the State Committee of the Production and Marketing Administration charged with the responsibility of administering Production and Marketing Administration programs within the State.

(b) "Farm" means all adjacent or nearby farm land under the same ownership which is operated by one person, including also:

(1) Any other adjacent or nearby farm land which the county committee, in accordance with instructions issued by the Assistant Administrator determines is operated by the same person as part of

the same unit with respect to the rotation of crops and with workstock, farm machinery, and labor substantially separate from that for any other lands; and (2) Any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops.

A farm shall be regarded as located in the county in which the principal dwelling is situated, or if there is no dwelling thereon it shall be regarded as located in the county in which the major portion of the farm is located.

(c) "New Farm" means a farm on which peanuts will be produced in 1948 for the first time since 1944, excepting any farm for which a 1942 peanut acreage allotment was established but on which peanuts were not produced in

1945, 1946, or 1947 because the owner or operator was serving in the armed forces of the United States.

(d) "Old farm" means:

(1) Any farm on which peanuts were produced in any year of the period 1945-1947, inclusive, or

(2) Any farm for which a 1942 peanut acreage allotment was established but on which peanuts were not produced in 1945, 1946, or 1947 because the owner or operator was serving in the armed forces of the United States.

(e) "Cropland" means that land on the farm which is included as cropland for purposes of the 1947 Agricultural Conservation Program.

(f) "Peanuts" mean all peanuts produced, excluding any peanuts not picked or threshed either before or after marketing from the farm.

(g) "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(h) "Person" means an individual, partnership, association, corporation, estate, or trust, or other business enterprise or other legal entity, and whenever applicable, a State, a political subdivision of a State, or any agency thereof.

(i) "Assistant Administrator" means the Assistant Administrator for Production, or the Acting Assistant Administrator for Production, of the Production and Marketing Administration of the United States Department of Agriculture.

(j) "Director" means the Director, or the Acting Director of the Fats and Oils Branch of the Production and Marketing Administration of the United States Department of Agriculture.

§ 729.606 *Extent of calculations and rule of fractions.* All peanut acreage allotments shall be calculated to the nearest one-tenth acre. Fractions of fifty-one thousandths of an acre or more shall be rounded upward, and fractions of five-hundredths of an acre or less shall be dropped. For example, 1.051 would be 1.1 and 1.050 would be 1.0.

§ 729.607 *Instructions and forms.* The Director, with the approval of the Assistant Administrator, shall cause to be prepared and issued such instructions and forms as may be deemed necessary for carrying out §§ 729.604 to 729.617, inclusive.

§ 729.608 *Applicability of §§ 729.604 to 729.617 inclusive.* Sections 729.604 to 729.617, inclusive, shall govern the establishment of farm peanut acreage allotments in connection with farm marketing quotas for the crop produced in the calendar year 1948. The applicability of §§ 729.604 to 729.617, inclusive, is contingent upon approval of marketing quotas by growers in a referendum conducted pursuant to section 358 of the Agricultural Adjustment Act of 1938, as amended.

§ 729.609 *State committee distribution of State peanut acreage allotment.* The State committee shall set aside such part of the State peanut acreage allotment as shall be necessary in light of the experience under previous agricultural conservation and adjustment programs,

as a reserve for establishing allotments for new farms: *Provided*, That such reserve shall not exceed two percent of the State allotment. The State committee shall determine county peanut acreage allotments by distributing the State allotment, less the reserve approved for establishing allotments for new farms among the counties in which peanuts are grown on the basis of the average peanut acreage in the county in the three years 1944-1946, adjusted for abnormal conditions of production, taking into consideration the county peanut acreage allotments for 1942. The State committee shall estimate the peanut acreage for any county for any of the three years for which complete data are not available.

§ 729.610 *Operator's report of data for old farms.* On or before October 15, 1947, the operator of each old farm, or any other interested person, shall furnish to the county committee for the county in which the farm is located, the following information:

(a) The name and address of the 1947 operator.

(b) The name and address of each other person who as landlord, tenant, or sharecropper will share in the proceeds of the 1947 peanut crop.

(c) The total acreage of all land in the farm.

(d) The acreage of cropland in the farm.

(e) The 1942 peanut acreage allotment for the farm, if known.

(f) The acreage of peanuts on the farm in the years 1944, 1945, 1946, and 1947.

(g) Information requested by the county committee relative to changes in operations or in size of the farm.

Information not furnished the county committee by October 15, 1947, shall be determined or appraised by the committee on the basis of records of the office of the county committee, production and sales records, or other available information.

§ 729.611 *Review of farm data by community and county committees.* County committeemen, with the assistance of community committeemen, shall review the data for each farm as obtained under § 729.610.

(a) *Corrections.* On the basis of personal knowledge of the farm, records of the office of the county committee, production and sales records, or other available information, the county committee shall make corrections in the basic farm data as required.

(b) *Adjustments.* The county and community committees shall examine the farm peanut acreages for 1944, 1945, and 1946, as obtained under § 729.610 and corrected under paragraph (a) of this section, and, where necessary, adjust such acreages to reflect normal acreages as follows:

(1) For farms for which a 1942 peanut allotment was established but on which the acreage of peanuts for 1945 and/or 1946 was abnormally low, or no peanuts were grown, because the owner or operator was serving in the armed forces of the United States, the county committee shall determine a normal

peanut acreage for each such year, taking into consideration the acreage of peanuts customarily grown on the farm, tillable acreage available for the production of peanuts, past peanut acreage allotments, if any, determined for the farm, and the peanut acreage for other farms which are similar with respect to peanut production.

(2) For farms on which the acreage of peanuts in one of the years 1944-1946, inclusive, is determined to be abnormally high, the county committee shall determine a normal peanut acreage for the one year. Taking into consideration the acreage of peanuts customarily grown on the farm, tillable acreage available for the production of peanuts, and the acreage of peanuts produced on farms which are similar with respect to peanut production. Such normal peanut acreages shall be within the following limits:

(i) The normal peanut acreage determined for 1944 or 1945 shall be not less than the average peanut acreage for the farm for the three-year period 1944-1946.

(ii) The normal peanut acreage determined for 1946 shall be not less than the larger of the average peanut acreage for the farm for the three-year period 1944-1946 or the 1947 peanut acreage for the farm if known to the county committee.

Farm peanut acreages established pursuant to §§ 729.610 and 729.611 shall be hereinafter referred to as adjusted acreages.

§ 729.612 *Determination of county allotment reserves—(a) Reserve for corrections.* The county committee shall determine the portion of the county peanut acreage allotment determined pursuant to § 729.609 to be set aside as a reserve for the correction of errors in farm peanut acreage allotments resulting from inaccurate data, or the omission of data, required under the provisions of § 729.610. In determining the acreage to be set aside, the county committee shall also take into consideration the acreage of peanuts grown on farms for which allotments are not established under §§ 729.614 and 729.615 because the peanut acreages on such farms in each of the years 1944-1947 was one acre or less. The county allotment reserve for corrections recommended by the county committee shall be subject to the approval of the State committee, or its authorized representative.

(b) *Reserve for adjustments.* The county committee shall determine the portion of the county peanut acreage allotment determined pursuant to § 729.609 to be set aside as a reserve for the upward adjustment of indicated farm peanut acreage allotments determined under § 729.614. The portion set aside shall be that required to adjust indicated farm peanut acreage allotments to give fair and equitable treatment between farms; taking into consideration the relative number of old farms in the county which have produced substantially the same acreage of peanuts in the four years 1944-1947; the acreage of peanuts grown on farms producing peanuts in 1947 for the first time since 1944; the number of old farms in

the county for which 1942 peanut acreage allotments were established; and the relation between the 1948 county peanut acreage allotment, the average peanut acreage for the county for the three-year period 1944-1946, the 1942 county peanut acreage allotment, if any, and the acreage of cropland in the county available for the production of peanuts. The county allotment reserve for adjustments recommended by the county committee shall be subject to the approval of the State committee or its authorized representative.

§ 729.613 *Determination of county factor* A county factor shall be determined for each county by dividing the sum of the 1944-1946 average adjusted acreage for all old farms in the county into the county peanut acreage allotment less the acreages set aside as county allotment reserves under § 729.612.

§ 729.614 *Determination of indicated peanut acreage allotments for old farms.* The indicated peanut acreage allotment for each old farm shall be the result obtained by multiplying the 1944-46 average adjusted acreage of peanuts for the farm by the county factor determined pursuant to § 729.613.

§ 729.615 *Determination of peanut acreage allotments for old farms.* The peanut allotment for each old farm shall be the indicated peanut acreage allotment for the farm as determined pursuant to § 729.614 unless such indicated allotment is adjusted upward by the county committee, with the assistance of community committeemen, on the basis of the following considerations:

(a) The 1942 peanut acreage allotment, if any, determined for the farm.

(b) Tillable acreage available for the production of peanuts as evidenced by the cropland in the farm, records of the office of the county committee, and committeeman knowledge of the acreage of other crops normally produced on the farm.

(c) The acreage of peanuts customarily grown on the farm.

(d) The number of years in which peanuts have been produced on the farm.

(e) Allotments determined for other farms in the county which are similar with respect to peanut production.

(f) Equipment available for peanut production.

For any farm producing peanuts in 1947 and for which the indicated peanut acreage allotment is zero (0) because no peanuts were produced in 1944, 1945, or 1946, the adjustment shall not exceed 75% of the 1947 adjusted peanut acreage for the farm. The adjustment for any other farm shall be such that the farm peanut acreage allotment will not exceed the larger of

(1) The 1942 peanut acreage allotment, if any, for the farm,

(2) The average of the adjusted peanut acreages for the farm for such years of the period 1944-1946, inclusive, in which peanuts were produced on the farm, or

(3) 75% of the 1947 adjusted peanut acreage for the farm.

The acreage used in making upward adjustments under this section shall not

exceed the acreage reserve set aside from the county peanut acreage allotment pursuant to § 729.612 (b). The total of all peanut acreage allotments established for old farms in the county shall not exceed the county peanut acreage allotment.

§ 729.616 *Approval of determinations made under § 729.604 to § 729.615, inclusive.* The State committee, or its authorized representative, shall review farm peanut acreage allotments and may correct or require correction of any determinations made under §§ 729.604 to 729.615, inclusive. All farm peanut acreage allotments shall be approved by the State committee or its authorized representative and no official notice of allotment shall be given in accordance with § 729.617 until such allotment has been approved by the State committee.

§ 729.617 *Notice of farm acreage allotment and marketing quota.* After the State committee, or its authorized representative, has approved the farm peanut acreage allotments determined for a county, the county committee shall notify the farm operator of each farm of the peanut acreage allotment and marketing quota determined for the farm. Such notice shall be in writing on a form prescribed by the Director and shall be delivered to the 1947 operator or mailed to his last known address.

Done at Washington, D. C., this 10th day of October 1947.

Witness my hand and the seal of the Department of Agriculture.

Secretary of Agriculture.

## PROPOSED RULE MAKING

### DEPARTMENT OF AGRICULTURE

#### Production and Marketing Administration 17 CFR, Ch. IX]

#### HANDLING OF MILK IN ST. JOSEPH, MO., MARKETING AREA

#### NOTICE OF RECOMMENDED DECISION AND OP- PORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND TO PROPOSED ORDER

Pursuant to the rules of practice and procedure governing proceedings to formulate marketing agreements and orders (7 CFR, Supps., 900.1 et seq., 11 F. R. 7737; 12 F. R. 1159, 4904) notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and to a proposed order to be made effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.) Interested parties may file written exceptions to this recommended decision with the Hearing Clerk, Room 1844, South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 10th day after publication of this recommended decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

**Preliminary statement.** A hearing on a proposed marketing agreement and proposed order was conducted at St. Joseph, Missouri, on May 19-22, 1947, after the issuance of notice on April 17, 1947 (12 F. R. 2574)

The material issue on the record was whether an order should be issued to regulate the handling of milk in the St. Joseph, Missouri, marketing area.

**Findings and conclusions.** Upon the basis of the evidence adduced at such hearing, it is hereby found and concluded that an order should not be issued and a marketing agreement should not be entered into to regulate the handling of milk in the St. Joseph, Missouri, marketing area.

The record does not evidence marketing conditions which are persuasive of a need for the institution of regulation under the Agricultural Marketing Agreement Act of 1937, as amended. The rec-

ord shows that returns are currently prorated to all producers by means of a market-wide pool operated through the producers' association. The evidence does not substantiate the view that the orderly marketing of milk and its products is being disrupted at the present time, that handlers have failed to properly classify the milk received, or that they have improperly weighed or tested producer milk. Likewise the evidence fails to show that the prices received by producers were unreasonable in view of prevailing economic conditions or were inadequate to insure a sufficient supply of pure and wholesome milk.

In view of the conclusion that the record fails to establish the need for an order, or marketing agreement, there appears to be no need for a discussion of the issues relating to the individual provisions of the order which was proposed for this marketing area.

**Proposed findings and conclusions.** Briefs were filed on behalf of the St. Joseph Milk Producers Inc., and on behalf of the handlers in the marketing area. Every point covered in the briefs was carefully considered, along with the evidence in the record in making the finding and reaching the conclusion hereinbefore set forth. To the extent that any findings and conclusions were proposed which are inconsistent with the proposed findings and conclusion contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusion in this recommended decision.

Filed at Washington, D. C., this 10th day of October 1947.

Acting Assistant Administrator.

(34) Gas metering stations for both purchase and sales will be constructed and installed at all appropriate points.

Applicant states that it is a new corporation, organized for the sole purpose of buying, constructing, and operating the pipe lines described hereinbefore for the transportation and sale of natural gas; that it owns no gas producing, manufacturing or distributing properties and has no other interest except that which is connected with this proposed project.

Applicant further states that, at the proper time, it will make applications to do business in the States of Louisiana, Mississippi, Alabama, Georgia, South Carolina, North Carolina, Virginia, Maryland, Delaware, Pennsylvania, New Jersey and New York.

Applicant proposes to supply natural gas to the following major gas companies now supplying the consumer's markets in the Eastern Seaboard area of the States of New York, Pennsylvania and New Jersey:

Consolidated Edison Company of New York, Inc., New York, New York.

The Brooklyn Union Gas Company, Brooklyn, New York.

Public Service Electric and Gas Company, Newark, New Jersey.

Philadelphia Electric Company, Philadelphia, Pennsylvania.

Applicant further states that in addition to these public utilities various other companies in the Eastern Seaboard area may be served.

It is alleged by Applicant that the natural gas to be supplied to these companies will be used mainly for enrichment and reforming in connection with their manufactured gas operations; that the area is presently being served with various combinations of carbureted water gas, coke oven gas, and refinery gas; and that there is a potential demand for natural gas in the consuming areas proposed to be served far in excess of the capacity of the proposed main transmission pipe line.

It is further alleged by Applicant that the proposed facilities are designed to deliver at the eastern terminus approximately 325,000,000 cu. ft. of gas per day that a pressure of approximately 425 per square inch absolute at the delivery end of the main line at Linden, New Jersey, will be maintained by use of compressor stations installed at regular intervals, compressing the gas to 815 per square inch absolute; and that the line will be installed with the ultimate compressor capacity and will begin operation delivering the maximum flow.

It is asserted by Applicant that it proposes to purchase all of its gas requirements, and that gas supplies will be obtained from reserves in Rogers Macy, McAllen, LaBlanca and San Salvador Fields in Hidalgo County, Texas; LaGloria Field in Brooks and Jim Wells Counties, Texas; Alice, Ben Bolt, Banderera, etc., Fields in Jim Wells County, Texas; Sun Field in Brooks County, Texas; Pledger Field in Brazoria and Matagorda Counties, Texas; Egan Field in Acadia Parish, Louisiana; West Gueyden Field, Vermillion Parish, Louisiana; and other fields along the route of the line.

It is further asserted by Applicant that it proposes to make every effort to utilize to the economic maximum those quantities of gas along the route of its line which are presently flared.

Applicant estimates the total over-all capital cost of its proposed project to be \$150,000,000, which it proposes to finance by arranging a bank loan in the amount of \$27,000,000, bearing interest at the rate of  $2\frac{1}{2}\%$  over a ten year life and the issuance of the following securities:

Bonds, 3% 20-year-----	\$90,000,000
Preferred Stock, $4\frac{1}{2}\%$ -----	18,000,000
Common stock-----	15,000,000

Applicant states that it has been advised by White, Weld & Co. of New York that the latter company will be prepared, in association with others whom they will select, to underwrite Applicant's necessary financing.

Any interested State commission is requested to notify the Federal Power Commission whether the application, as amended, should be considered under the cooperative provisions of Rule 37 of the Commission's rules of practice and procedure (18 CFR 1.37) and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

The application of Trans-Continental Gas Pipe Line Company, Inc., as amended, is on file with the Commission and open to public inspection. Any person desiring to be heard or to make any protest with reference to the application, as amended, shall file with the Federal Power Commission, Washington 25, D. C., not later than October 22, 1947, a petition to intervene or protest. Such petition or protest shall conform to the requirements of Rule 8 or 10, whichever is applicable, of the rules of practice and procedure (effective September 11, 1946) (18 CFR 1.8 or 1.10)
